

## Organic Statement

GSB Flavor Creators has been certified to manufacture organic flavors by the Georgia Crop Improvement Association Organic Certification Program since June 13, 2003. At that time we had certified both 100% organic and 95% organic flavors.

During the year 2007, the National Organic Program (NOP) was amended to add many color additives and other additives to the list of ingredients allowed to be labeled organic, as long as they were not commercially available as certified organic. This somehow resulted in our organic certifier rescinding the organic certifications for our 95% organic flavors.

GSB Flavor Creators has decided that until the organic regulations are cleared up and all organic certifiers agree with each other, as do the Kosher Inspectors, we will offer a line of 95% NOP organic compliant flavors, as well as 100% organic certified flavors.

All our 95% NOP organic compliant flavors are made with 100% natural ingredients and, to the best of our knowledge,

1. Do not contain any genetically modified material.
2. Are not derived from any genetically modified material.
3. Have not been irradiated.
4. Have not been produced using any sewer sludge at any point.
5. Have not been produced, to the best of our knowledge, using synthetic solvents.
6. Do not, to the best of our knowledge, contain any artificial flavor, color nor preservatives.

7. Are not available commercially as a certified organic product.
8. Do not, to the best of our knowledge, contain any synthetic solvents or carriers.

The 95% NOP organic compliant flavors we are listing have been previously certified as 95% organic certifiable by our organic certifier. They are:
